

# FARHAN NUR IMAN BIN SHAMRULISMAWI

Shah Alam, Selangor | (+60) 19-711 6899 | farhannuriman123@gmail.com | linkedin.com/in/farhannuriman | github.com/Zyru02

## PROFESSIONAL SUMMARY

Information Systems graduate (Big Data Analytics) with hands-on experience delivering business intelligence solutions across corporate marketing, sales, and engineering functions. Proven ability to process 1M+ records monthly and build Power BI dashboards serving 325+ users, translating complex datasets into actionable insights that support executive decision-making. Technically versatile across Power BI, DAX, Power Query, SQL, Python, and Tableau. Seeking a Junior Data Analyst or Business Analyst role where data-driven analysis directly informs business strategy and organisational performance.

## CORE COMPETENCIES

Data Analysis | Business Intelligence | Data Visualisation | Dashboard Development | ETL & Data Consolidation | Requirements Gathering | Competency-Gap Analysis | Forecasting & Trend Analysis | Stakeholder Engagement | Report Automation

## TECHNICAL SKILLS

**BI & Analytics:** Power BI, DAX, Power Query, Tableau, SQL, Python, Microsoft Excel (VLOOKUP, Pivot Tables), VBA  
**Data & ML:** Data Mining, Machine Learning, Data Visualisation, Statistical & Empirical Methods, Business Intelligence  
**Development:** HTML, CSS, PHP, JavaScript, TypeScript, ReactJS, React Native, FastAPI, C, C++  
**Tools & Platforms:** Visual Studio Code, Android Studio, Microsoft 365

## PROFESSIONAL EXPERIENCE

|                                                                  |                                                          |
|------------------------------------------------------------------|----------------------------------------------------------|
| <b>MMC Oil &amp; Gas Engineering</b><br><i>Trainee Executive</i> | <i>June 2026 – Present</i><br><i>Shah Alam, Selangor</i> |
|------------------------------------------------------------------|----------------------------------------------------------|

- Analysed workforce manhour allocation across multiple concurrent engineering projects, improving resource visibility and enabling data-driven project planning and headcount forecasting.
- Developed an interactive resource-tracking model that aggregates multi-sheet engineering data to dynamically filter and display key metrics — project descriptions, document types, and position-specific manhour allocations — based on user-defined criteria.
- Built interactive Power BI dashboards with custom DAX measures and automated reporting workflows, significantly reducing manual data processing while improving reporting accuracy and executive decision-making.
- Recognised by management for delivering a solution that simplified complex manual workflows and improved resource planning and headcount visibility.

|                                                                                  |                                                          |
|----------------------------------------------------------------------------------|----------------------------------------------------------|
| <b>PETRONAS Chemical Group</b><br><i>Marketing &amp; Sales Capability Intern</i> | <i>January 2025 – August 2025</i><br><i>Kuala Lumpur</i> |
|----------------------------------------------------------------------------------|----------------------------------------------------------|

- Delivered monthly analytics on 1M+ records and enhanced a 10-page Power BI dashboard serving 325+ users across 10 departments, consolidating multiple data sources through Power Query and DAX.
- Analysed training-module completion across departments, surfacing learning-hour trends and underperformance against a 52-hour annual target while flagging anomalies and performance deviations.
- Conducted On-Job Training (OJT) competency-gap mapping with department heads and Commercial Transformation, aligning 378 line items across 298 unique OJT tasks with current business needs.
- Produced supporting documentation and process materials, demonstrating initiative across multiple professional-development workstreams.

## KEY PROJECTS

|                                               |                                                      |
|-----------------------------------------------|------------------------------------------------------|
| <b>AI Travel Planner — Mobile Application</b> | <i>Typescript, React Native, Gemini API, FastAPI</i> |
|-----------------------------------------------|------------------------------------------------------|

- Developed a mobile app that personalises Malaysian travel planning with cultural inclusivity and real-time adaptability, integrating the Gemini 2.5 Flash API and OSM Overpass API to aggregate live Points of Interest and dynamically re-plan itineraries via natural language.

#### Sales Performance Dashboard — Power BI

*Power BI, Microsoft Excel, DAX*

- Built a sales analytics dashboard to uncover hidden patterns in company sales records, highlighting sales, profit, loss, product, and regional performance, and forecasting future trends from historical data.

#### Child Presence Detection System

*C++, Radar Sensors, Aurix SoC*

- Designed a child-presence detection concept aligned to the NCAP 2.0 requirement using radar sensors and an Aurix SoC to strengthen in-vehicle safety and minimise heatstroke risk.

### CERTIFICATIONS

---

- Google Data Analytics Professional Certificate — Coursera (Completed)
- Google AI Professional Certificate — Coursera (In Progress, 4/9 courses completed)

### EDUCATION

---

#### Universiti Teknologi PETRONAS (UTP)

*January 2023 – April 2026*

*Bachelor of Information Systems (Hons) — Major: Big Data Analytics | Minor: Financial Management Perak*

- Relevant coursework: Data Science, Data Mining, Machine Learning, Business Intelligence, Data Visualisation, Statistical & Empirical Methods, Enterprise Resource Planning (ERP), Corporate Finance, Business Accounting.

#### Universiti Tenaga Nasional (UNITEN)

*June 2020 – June 2021*

*Foundation in Computer Science — CGPA 3.44*

*Selangor*

- Dean's List, Trimester 2, Academic Year 2020/2021.

### LEADERSHIP & INVOLVEMENT

---

#### K-Youth Development Program (AI Development)

- Applied prompt engineering and Responsible AI frameworks to design enterprise-grade LLM interactions, and architected an AI-driven web platform during a 48-hour capstone sprint using Google Stitch, Manus, and Jotform.

#### Business & Merchandise Committee — CONVOFEST

- Coordinated artisan and vendor recruitment, generating RM100,000 in vendor-registration revenue, and directed merchandise operations driving an estimated RM30,000 in additional revenue.

#### Head of Business — Zoolander Venture (MPU4 Project)

- Led a team to organise three Car Boot fundraising events, raising ~RM5,000 in vendor registration and ensuring full compliance with university regulations.

#### Event Management & Media Committee — STEMX

- Facilitated 50 primary-school students in STEM outreach and led event media, banner, and photography deliverables.
